## Mug Design Template

The RED line is the full size of the design. Your design needs to stay in the red lines or it will be cut off.

The GREEN line is the safe area. All important design elements should be inside the green rectangle.

The three "mugs" show you where on the mug your design will be placed. The middle of your design will be furthest from the handle. If you want your design to be prominently featured on one side of the mug, shift the design to the right or the left.
